LEAD MELTING TRAYS
WAX DIP HEATERS

RECREATIONAL

HEATED VESTS • HEATED SOCKS
HEATED MITTENS
HEATED BOOTS • HEATED BLANKETS

Want to safely heat your floors, walls, or even your rugs? Rather not shovel your walkway in the winter? Need to keep critical components such as water pipes and aircraft wings from freezing? Or maybe you'd just like some truly effective heated mittens? All of this and more is easily achievable with the patented Lovell medium- (**MTCRP**) and high-temperature (**HTCRP**) conductive resistive paints, coatings, and laminates. Common components (graphite, china clay, water) and easy adaptability (from clothing and cookware to roof flashing and industrial ovens) result in the most versatile technology available to create dozens of different products across numerous market segments.
